MiTAC Computing User’s Guide

Version 5.0 2024-12-06

CTO 2.0 Portal

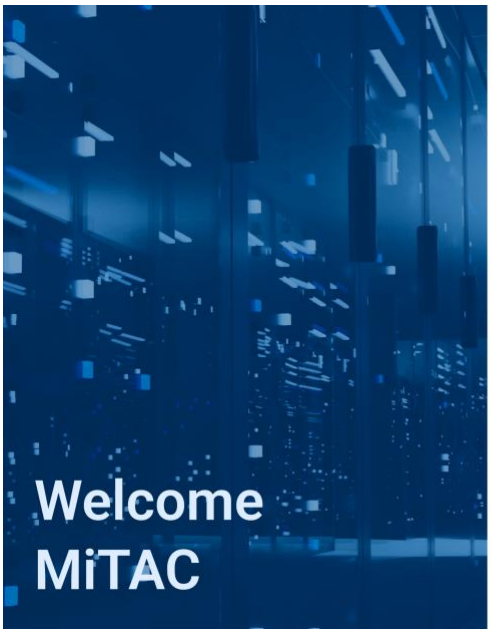
Introduction

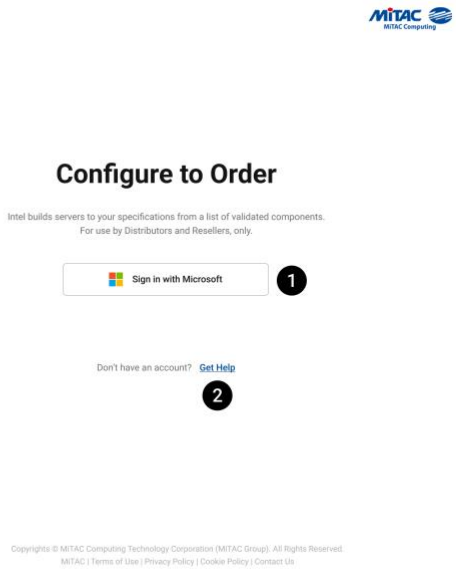
MiTAC CTO Portal is designed to allow customers to quickly generate a Quote Inquiry. Users can create an inquiry, add and configure the products, and submit to MiTAC for acceptance. The tool helps the users to facilitate their inquiries for further processing downstream.

CTO Portal Workflow

A. Login

All users are required to authenticate with MiTAC Single Sign-On. You will need to be registered with MiTAC in order to receive access.





a. Buttons

1. Sign in with Microsoft

   Enter the email and password form your completed application.

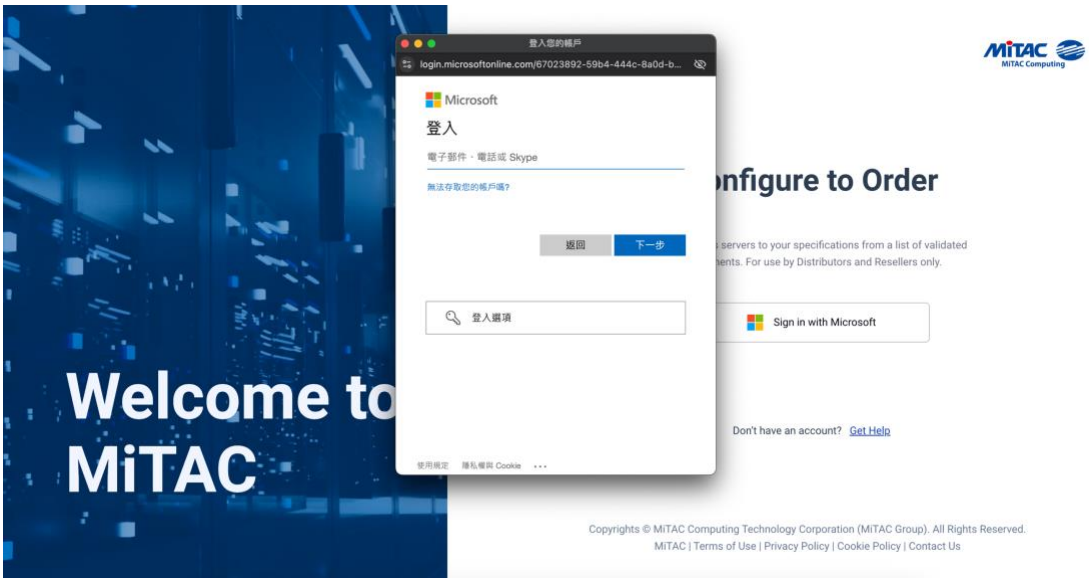
   Sign in not visible?

2. Get Help- Instructions for applying authorized account

   If you have not applied for permission yet, you can email DSGsales@mitac.com for support or contact the sales representative you have previously worked with.

b. About Pop up

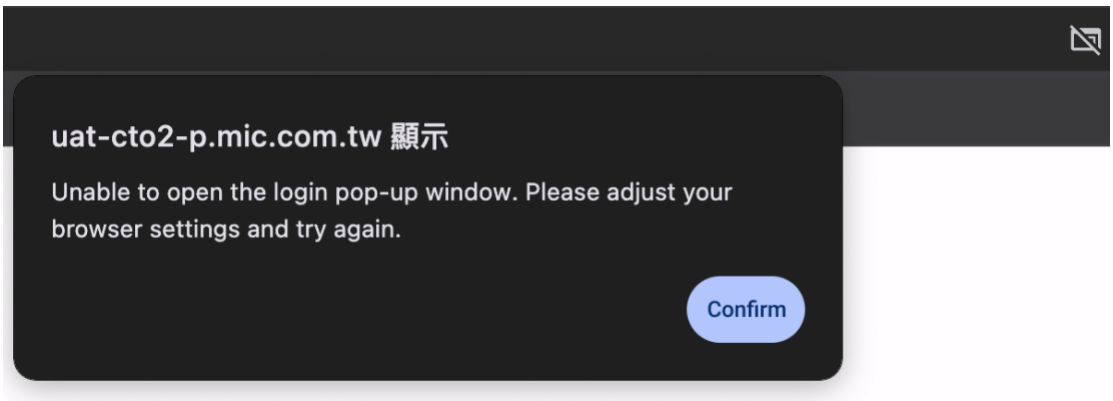
Click "Sign in with Microsoft" to open a pop-up window, as shown in the screenshot below.



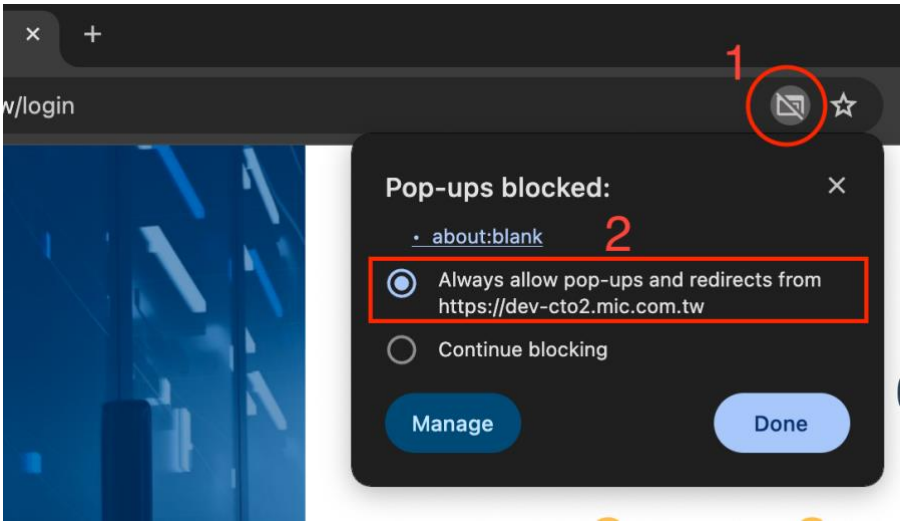
If it's your first time logging in and you see a prompt blocking pop-up windows, please adjust your browser settings to allow pop-ups before proceeding with the login.

- **Google Chrome**

1. Pop up Block



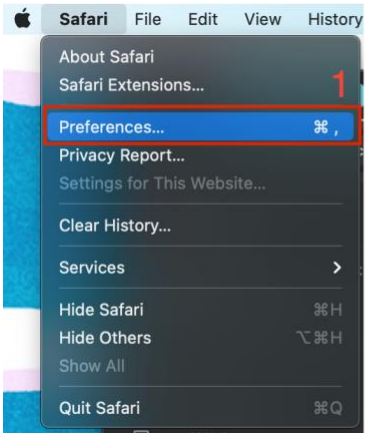
2. Pop up Allow setting

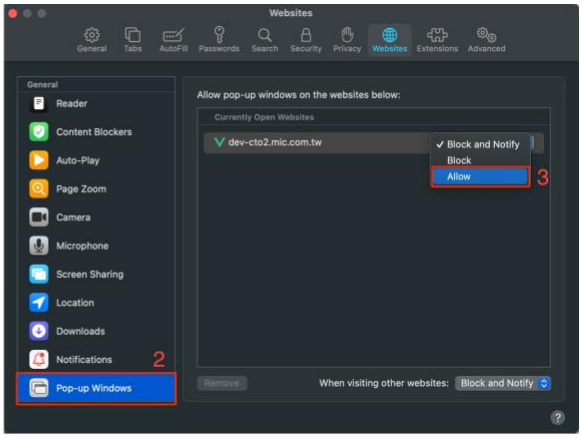


- **Safari**

1. Pop up Block

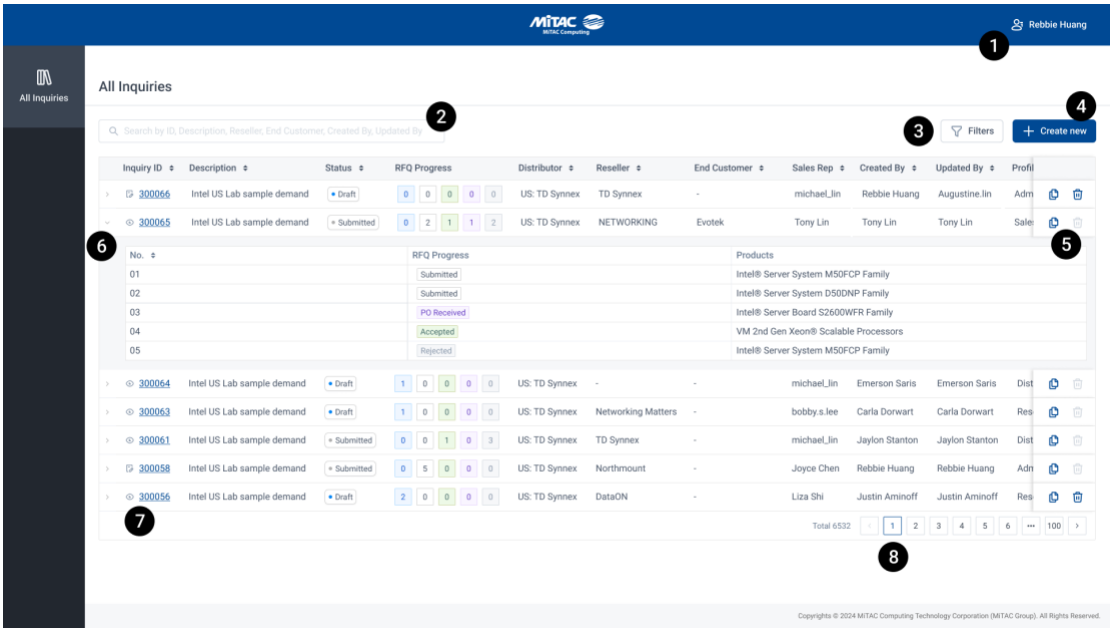
2. Pop up Allow setting





B. All Inquiries

On this page, you can view all the details of the inquiries, such as the creation time and status.



a. Buttons

1. User Profile- User's basic information
2. Search bar- search for an inquiry
3. Filter- Use filters to quickly find the required Inquiry
4. Create New- To add a new Inquiry
5. Duplicate (left icon)- Copy and create a new Inquiry with the existing information

   Delete (right icon)- Delete this Inquiry, but it cannot be deleted if the status is Submitted
6. Arrow- Expand the Inquiry to view Product Progress and Products
7. Inquiry ID- Click to edit the document (when in draft status)
8. Paginations- Switch pages to view other Inquiry data

b. Supplementary Explanation

1. Status- Inquiry Status

   1.1 Draft- Inquiry is saved as a draft; in this state, the Inquiry content can be adjusted at any time.

   1.2 Submitted- Inquiry has been submitted and is awaiting quotation; once submitted, the Inquiry cannot be modified.

2. Product Progress- Processing status of each product inquiry; after submitting the Inquiry, the Product will display the following four status changes:

   2.1 Draft- Inquiry is saved as a draft and has not been submitted yet

   2.2 Submitted- Inquiry has been submitted and is awaiting quotation

   2.3 Accepted- Quotation for this product is agreed

   2.4 PO Received- Purchase order has been placed based on the configuration of this Product

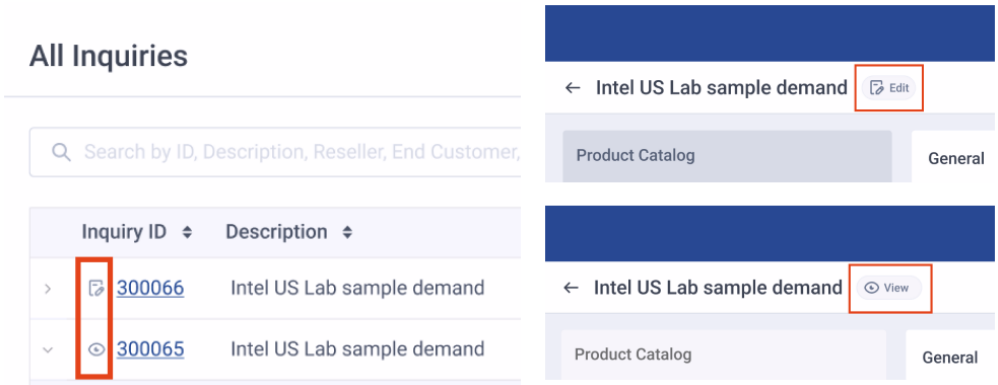
   2.5 Rejected- Configuration for this Product has been rejected or closed

3. About Permissions

   3.1 If the user's role is Distributor or Reseller, they can view all documents within the same company but can only modify the documents they created.

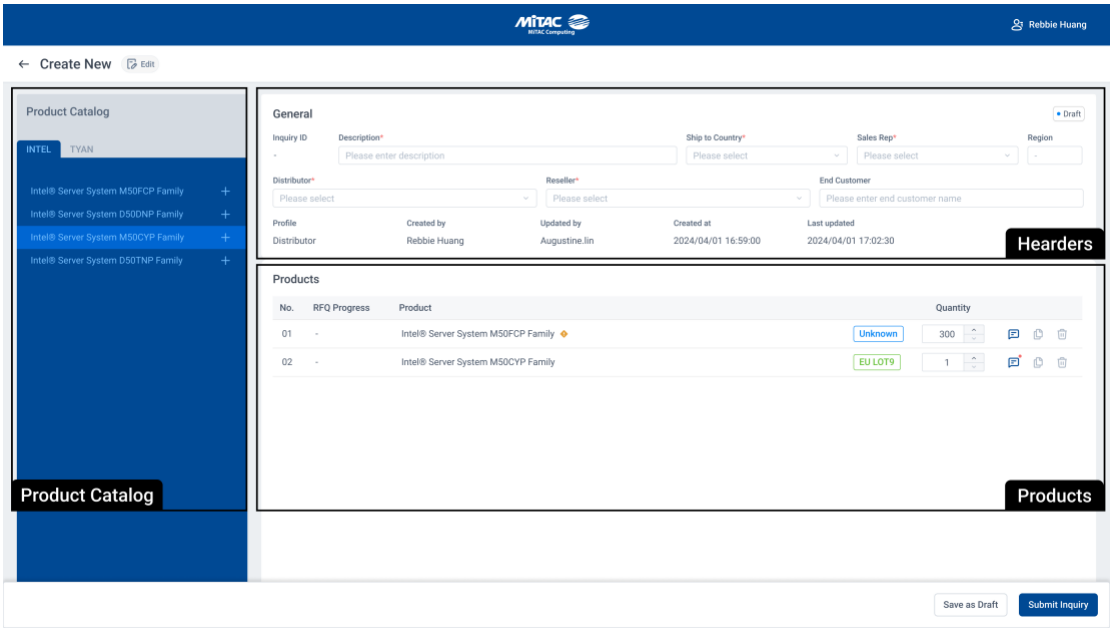
   3.2 If the user's role is Sales, they can view all documents within their assigned region, including those of Distributors/Resellers within the region. However, to edit or delete documents, the user must be in the same region and hold the Sales role.

   3.3 If the user's role is Sales Manager, they can view and modify documents of Sales representatives in any region. This can be identified by the document icons shown in the diagram below.

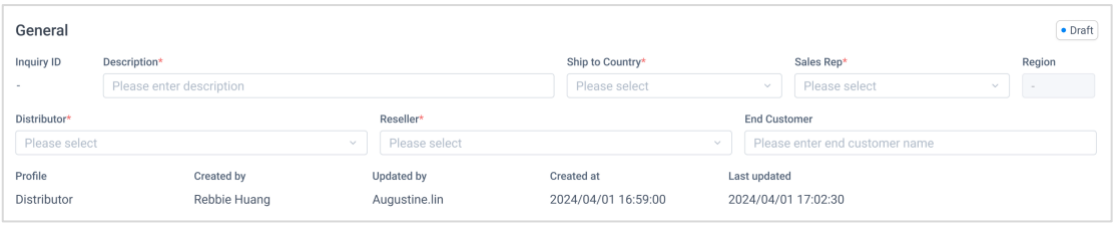


C. New Inquiry

Click "Create New" to create a new Inquiry form. Fill in the basic information and the items/products you wish to inquire about.



- Tip: When the input field or dropdown selection has data entered, you can hover the mouse over the right side of the field to reveal a clear icon. Click it to clear the data.

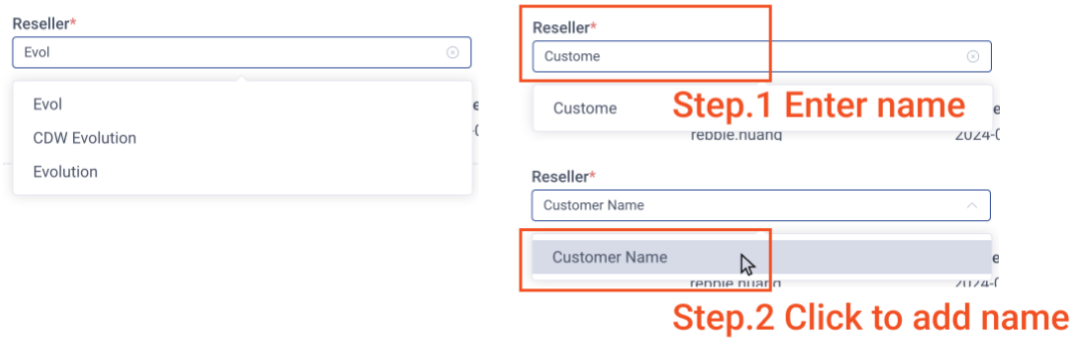


a. Headers (General)

1. Description- Text input field to describe the inquiry.
2. Ship to Country & Sales Pep- The list of countries is restricted to the same region assigned to the user’s own company, Sales Rep list is also restricted to only those Sales Rep in the same region.

3. Distributor- If you are a Sales, you can specify the Distributor for your assigned region. If you are a Distributor, this field is automatically set to your company's name. If you are a Reseller, you can choose your Distributor.
4. Reseller- The rules are the same as for the Distributor field, but you can add Reseller names that are not on the list.

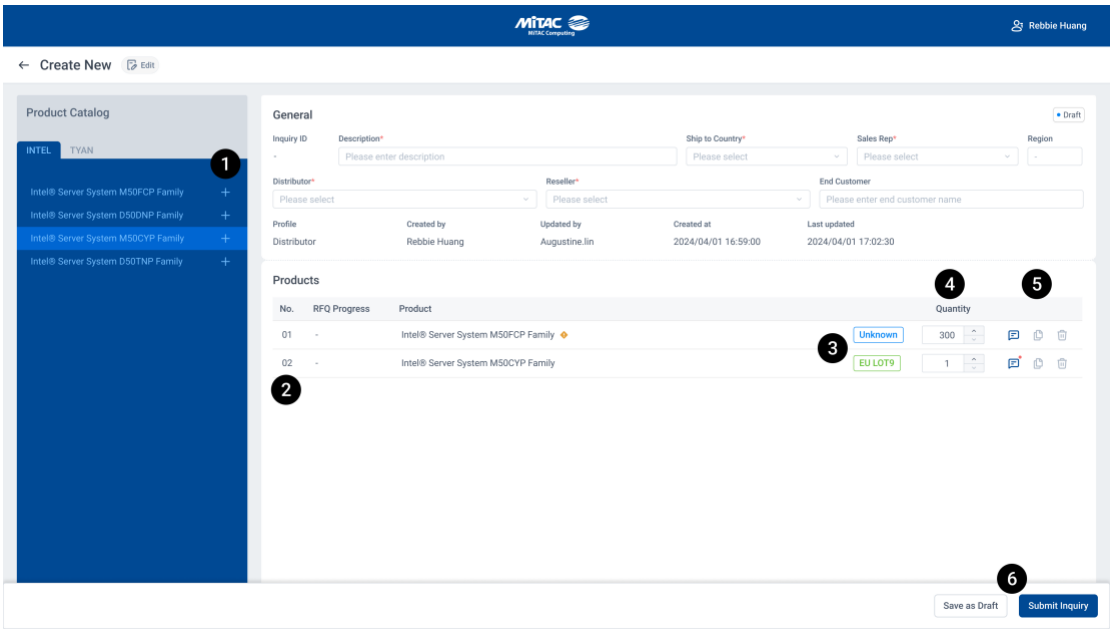
- Note: You can enter the Customer's name to search if it is in the list (left image). If the Customer is not in the list, you can manually enter it. First, input the Customer Name, then click on the name to complete the entry (refer to the right image). The newly entered name will be temporarily saved in the list. Once you perform an action (e.g., Return or Submit) and leave the page, the list will no longer include this entry.



Left- Search name

Right- Add Reseller

5. End Customer- Name of the end customer the inquiry is created for.
6. Profile- Description of the user's role type.
7. Created By- The person who created the inquiry.
8. Updated By- The person who last modified the inquiry.
9. Inquiry Status- Displayed in the top right corner, with two states: Draft or Submitted.



b. Buttons

1. Product Catalog- List of MiTAC products; allows selection of desired products for configuration.
2. Number- Click to edit Configuration details.
3. EU Lot9- Intel supports customers collecting auxiliary tools in the EU Lot 9 announcement of final server systems. Its Compliance Indicators for idle power consumption allows for products shipping into the European Union. >>More EU LOT9 descriptions
4. Quantity- Quantity of products needed.
5. (1) MM# & Comment- Enter MM# (Only users who need to iterate the MM number are required to fill in this field) or additional notes for the product, such as component replacements or questions.

   >>More about MM#

   (2) Duplicate- Copy all configurations of the original product to a new one.

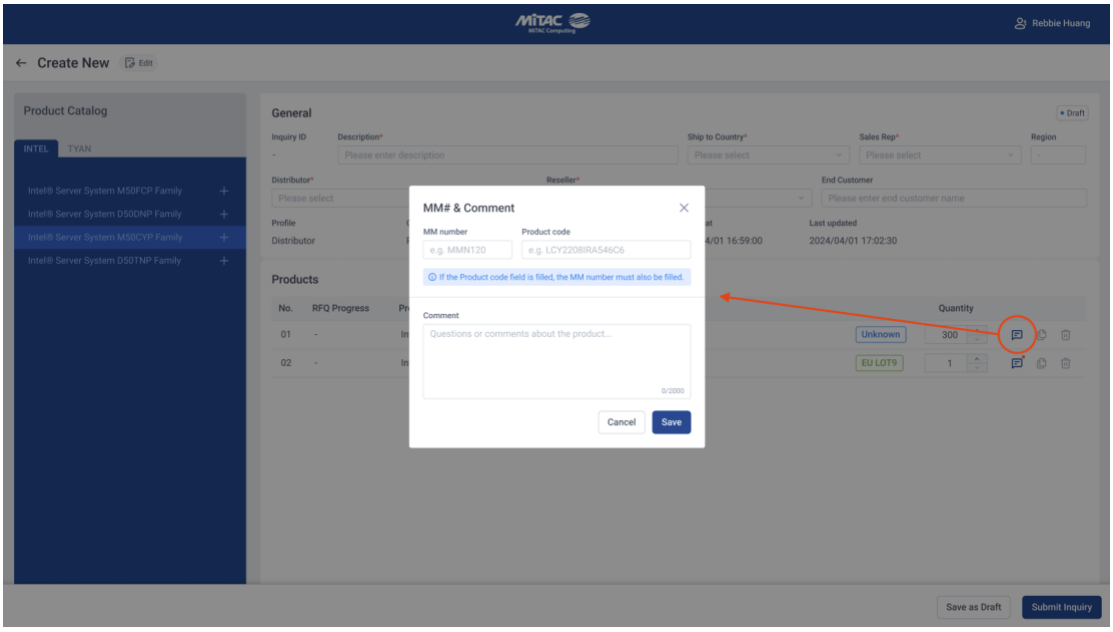
   (3) Delete- Remove the product from the Product list.
6. (1) Save as Draft- Temporarily save the data of this Inquiry for future adjustments.

   (2) Submit Inquiries- Submit this Inquiry for quotation without further adjustments.

7. Back (arrow icon)- Cancel creating Inquiry and return to the previous page

c. Adding Products step

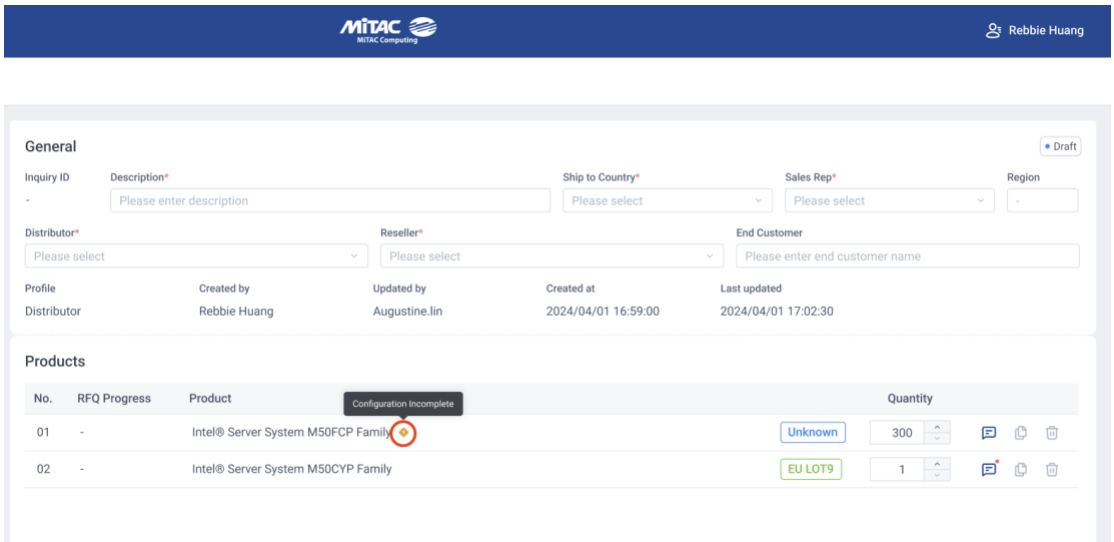
1. Select a product, to add to the inquiry, click the + symbol or Product name from Product Catalog
2. Once added, the product can be configured by clicking on the products number
3. Click button [MM#&Comment] (Speech balloons icon) can be modified MM# and Comments



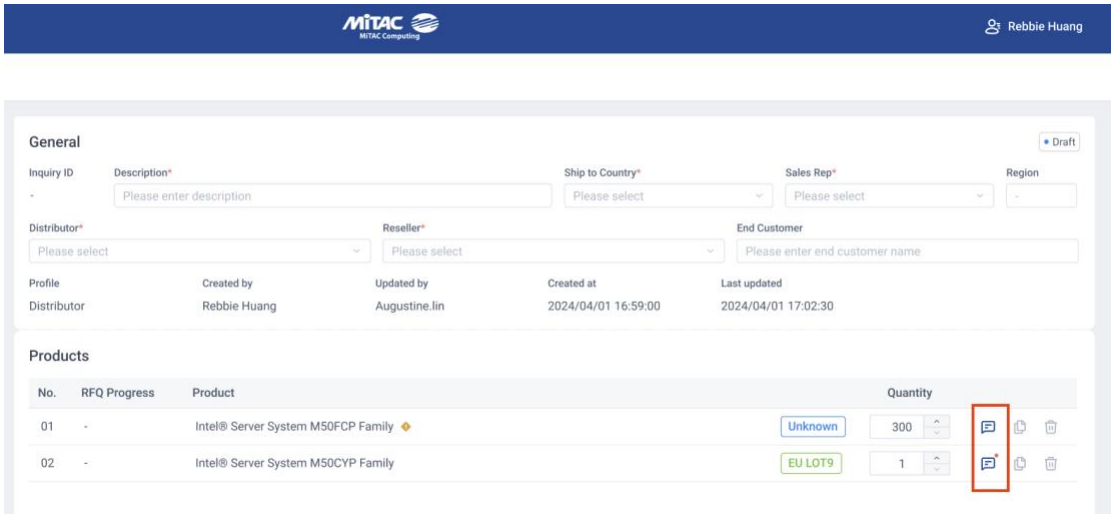
4. For MM#, the following are optional
   i. Enter MM# and Product code Field if the user knows the MM# and Product Code.
   ii. If the Product code field is filled, the MM number must also be filled.
   iii. Input the new data field and save again if you want to replace the original data.
   iv. If you want to delete previously filled data, simply clear the field(s) and then save the document again.

d. Supplementary Explanation

1. For products that haven't been fully configured, there will be an exclamation mark (!) displayed next to the product name.



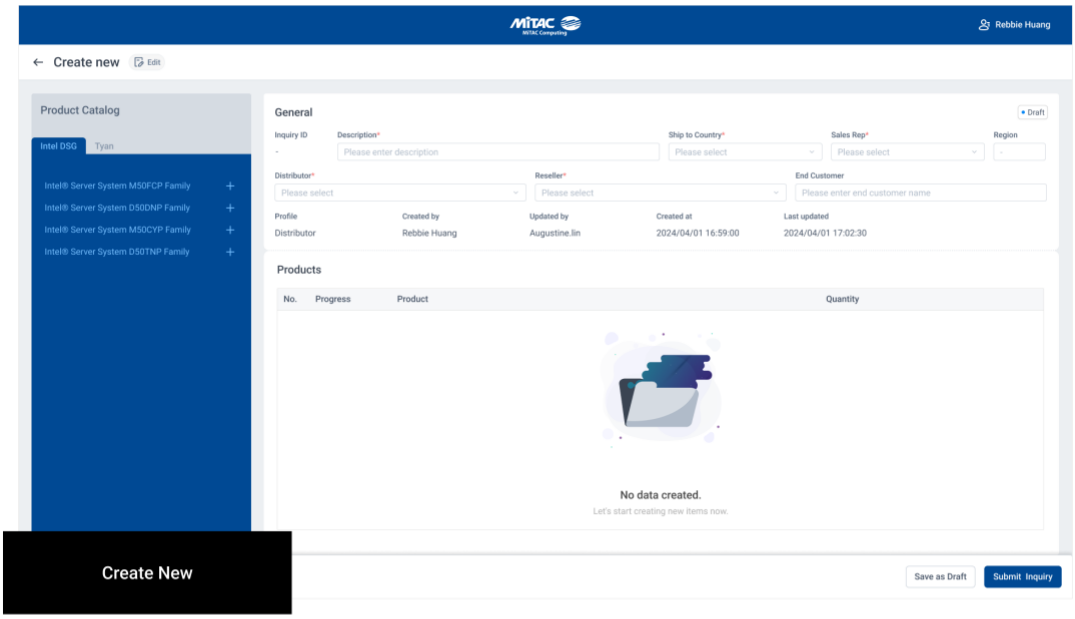
2. If either the MM# or Comment field is filled with content, a small red dot will appear.



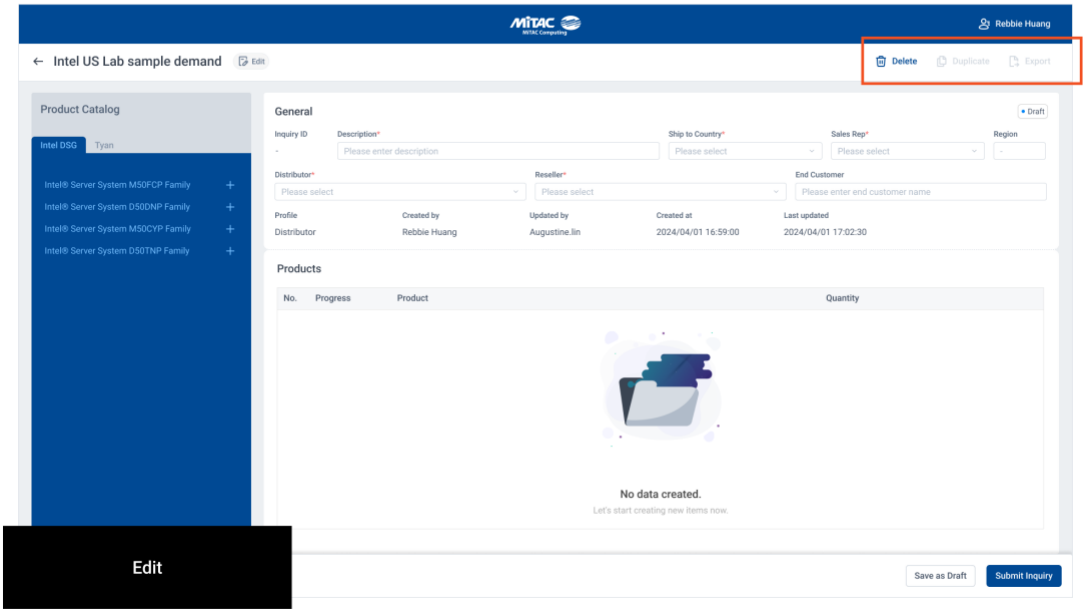
D. Create/Edit/Submitted Inquiry

a. Create & Edit Inquiry

1. When an inquiry is created for the first time and basic information or product items are added, it will be automatically saved and change the document to "Edit Inquiry." Before the Inquiry is submitted, all fields can be adjusted at any time.
2. In "Edit Inquiry" mode, three additional actions will appear in the upper right corner: Delete, Duplicate, and Export. If no product items are added, you will not be able to Duplicate or Export this Inquiry.



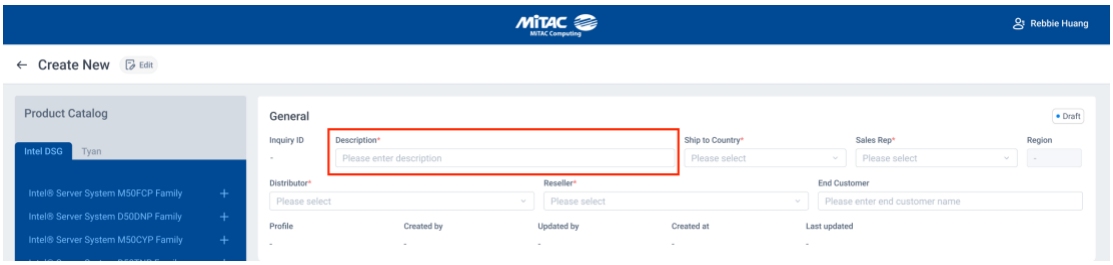
Create New

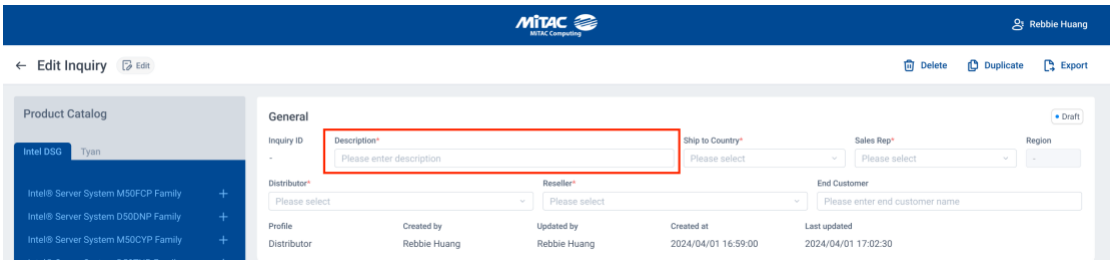


Edit

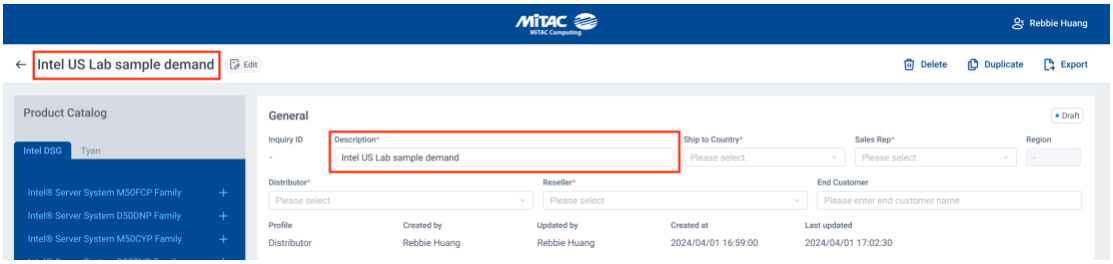
3. While in Draft mode, if the Inquiry is not named in the Description field, the default name in the upper left corner will be "Create New" or "Edit Inquiry." If the Inquiry is named, the name in the upper left corner will update accordingly.

- Description field does not have a name filled in



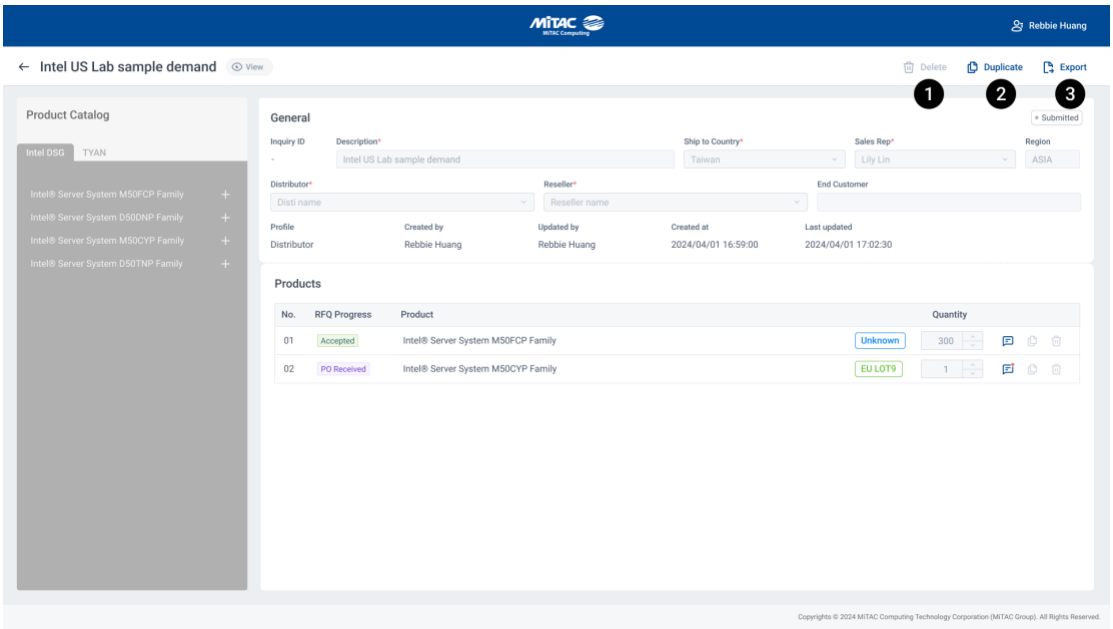


- Description field has a name filled in



b. Submitted Inquiry

1. After Inquiry submission, an Inquiry ID will be generated. All information will become uneditable, but you can still use the following functions, view Inquiry details, Product Progress, MM# & Comment, and use the three functions in the top right corner.
2. If you need to resubmit the contents of a previously submitted Inquiry, you can click [Duplicate] (2) button to copy a new Inquiry and submit it after editing.

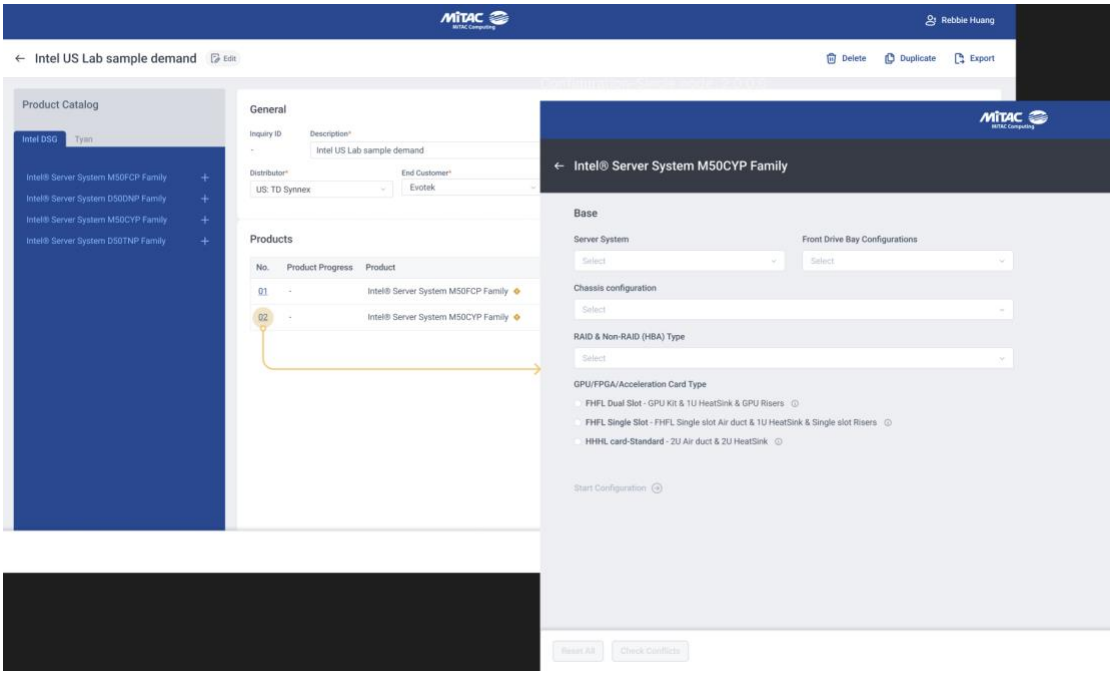


c. Buttons-The following actions include all Product Configurations:

1. Delete - Delete the entire Inquiry (The inquiry can't be deleted after it has been submitted)
2. Duplicate - Duplicate the entire Inquiry
3. Export - Export the Inquiry data to Excel

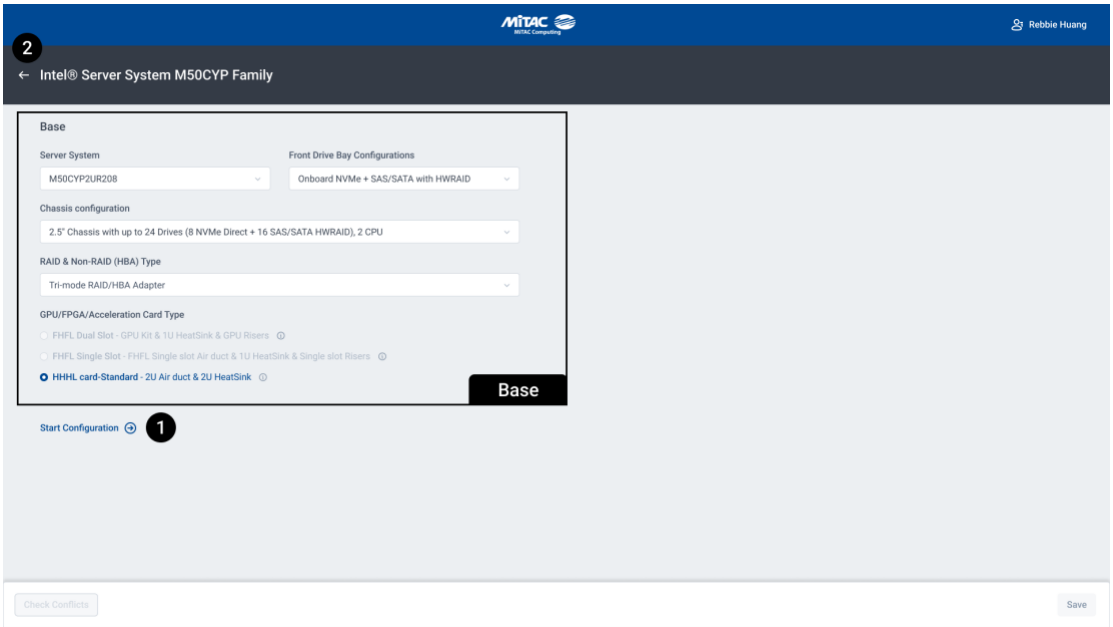
E. Configuring Product

Click on the Product No. enter product configuration.

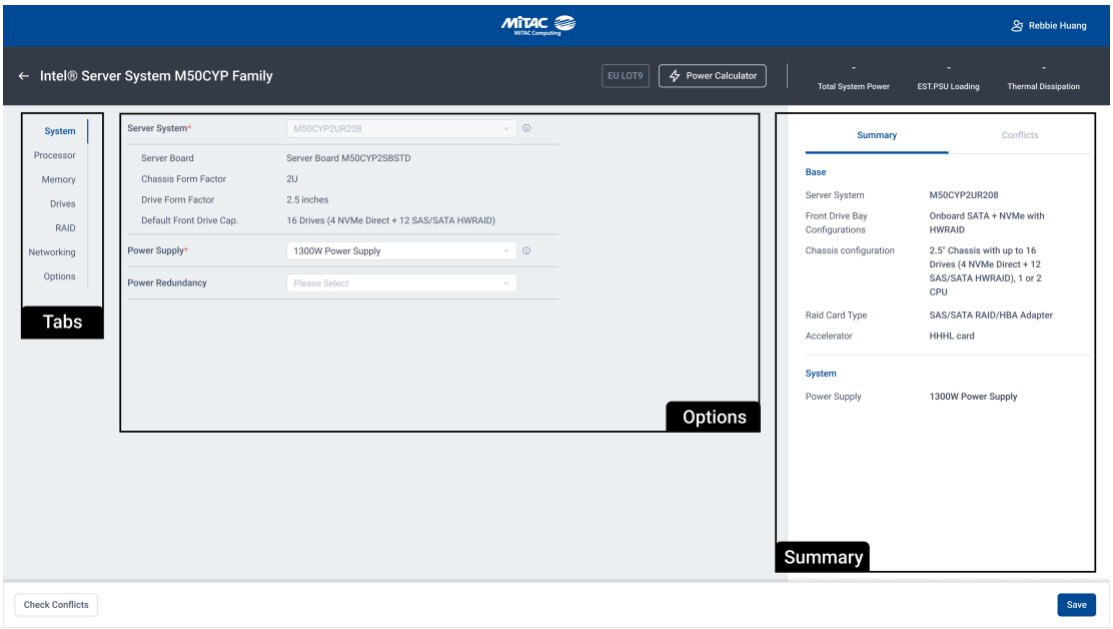


a. Configuring Product step

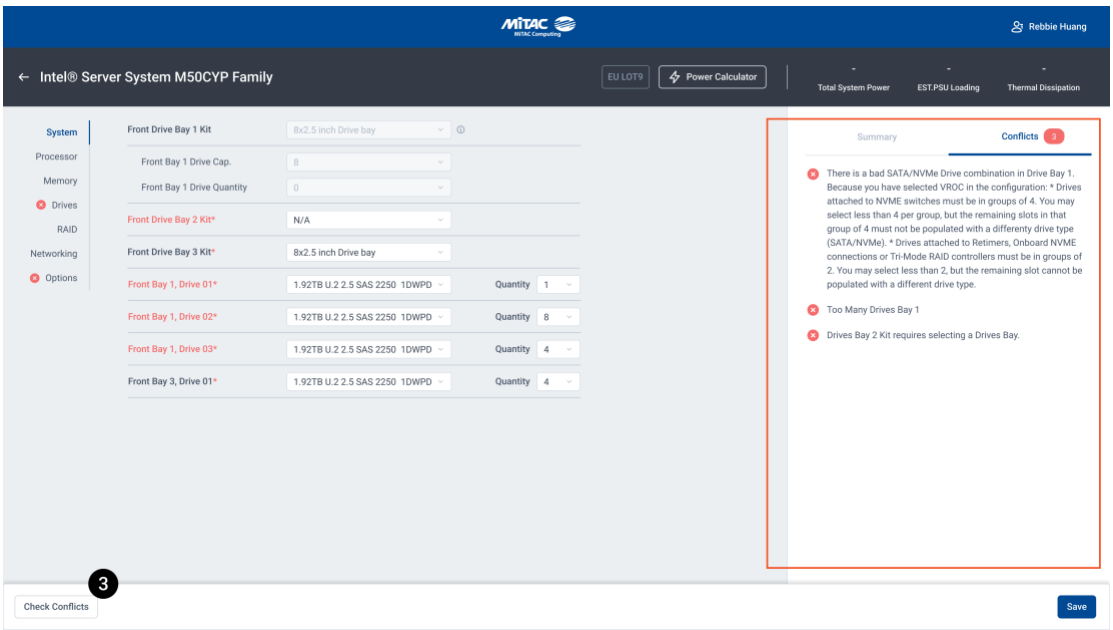
1. Before configuring the product, preset the package for this requirement to assist users with subsequent configuration selections.
2. After setting the base configuration package, click [Start Configuration] (1). If you want to cancel and go back to the previous page, click the arrow in the top left corner (2).



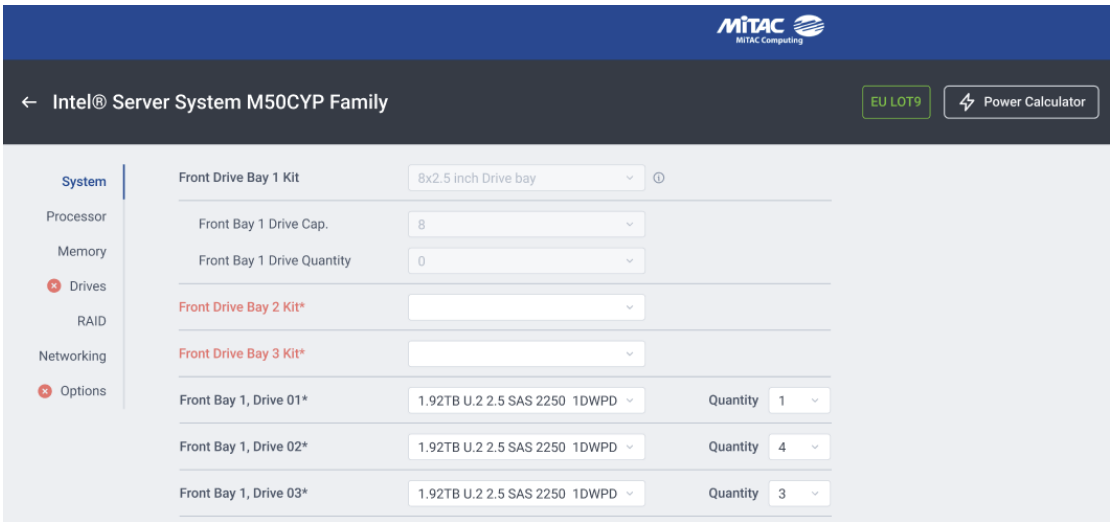
3. Users will be navigated through the different tabs to complete all the required options. Selected options are displayed in the Summary tab.



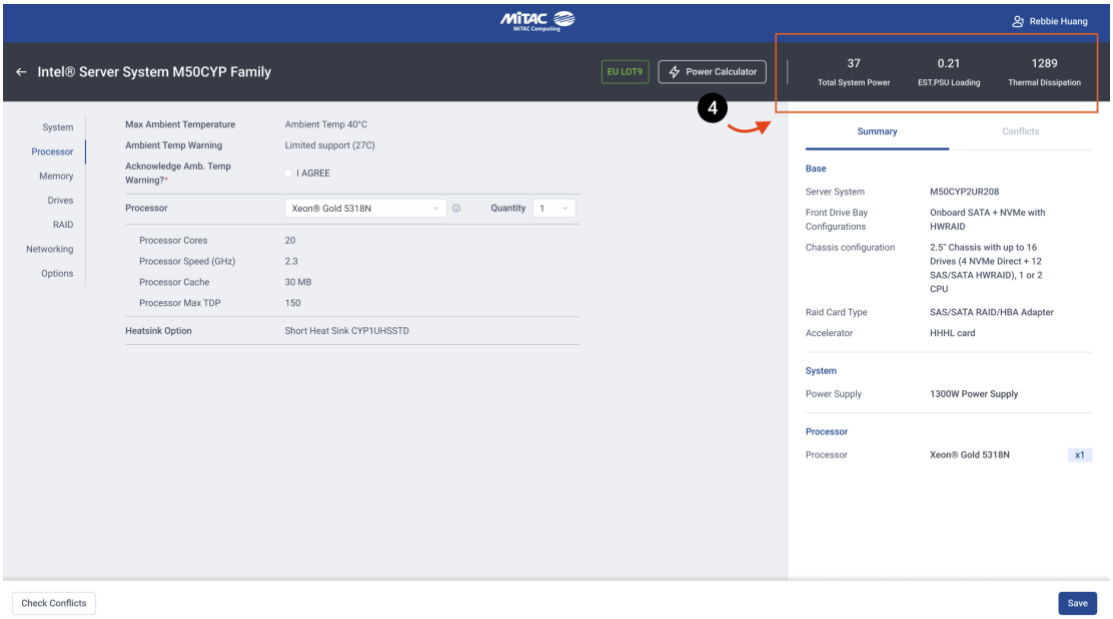
4. When the configuration is completed, please click [Check Conflicts] (3) to check if there are any conflicts that need adjustment. Switch to the Conflicts tab on the right to view a summary of conflict messages.



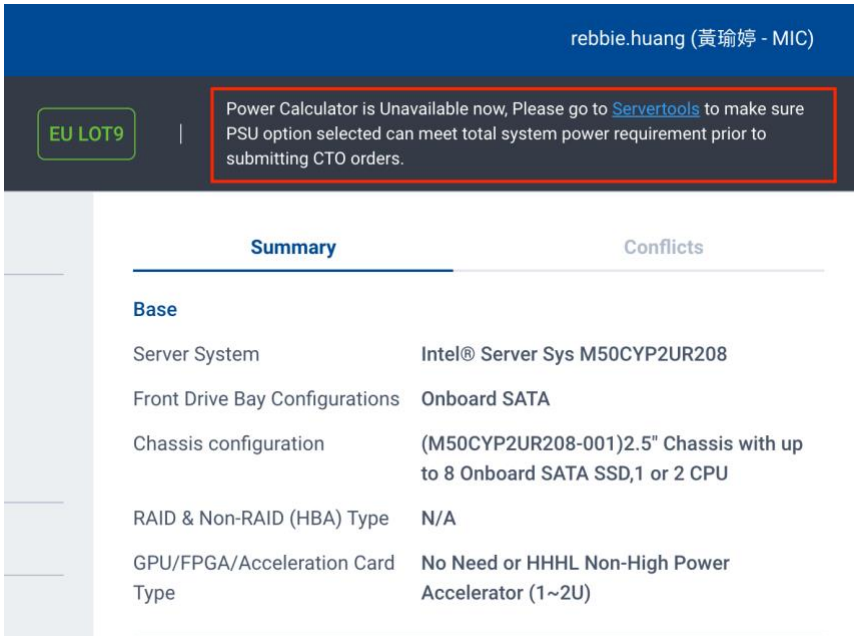
- Note: The configuration is in an incomplete (error) state and the required fields are marked with the red mark (X).



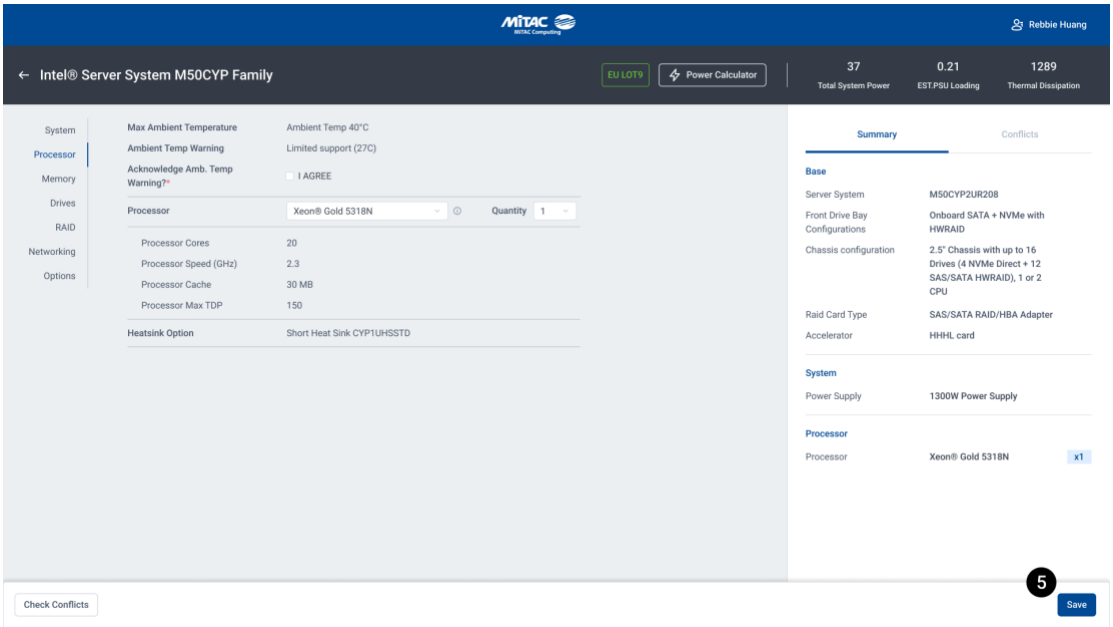
5. After choosing the components for each tab, click the [Power calculator] (4), power calculation will be executed. The EU LOT9 button will appear in one of the following colors, green, yellow or red. Green means the configuration is highly likely to pass the EU LOT9 idle, while yellow and red means not. Click the EU LOT9 button to see detailed descriptions. >>More EU LOT9 descriptions

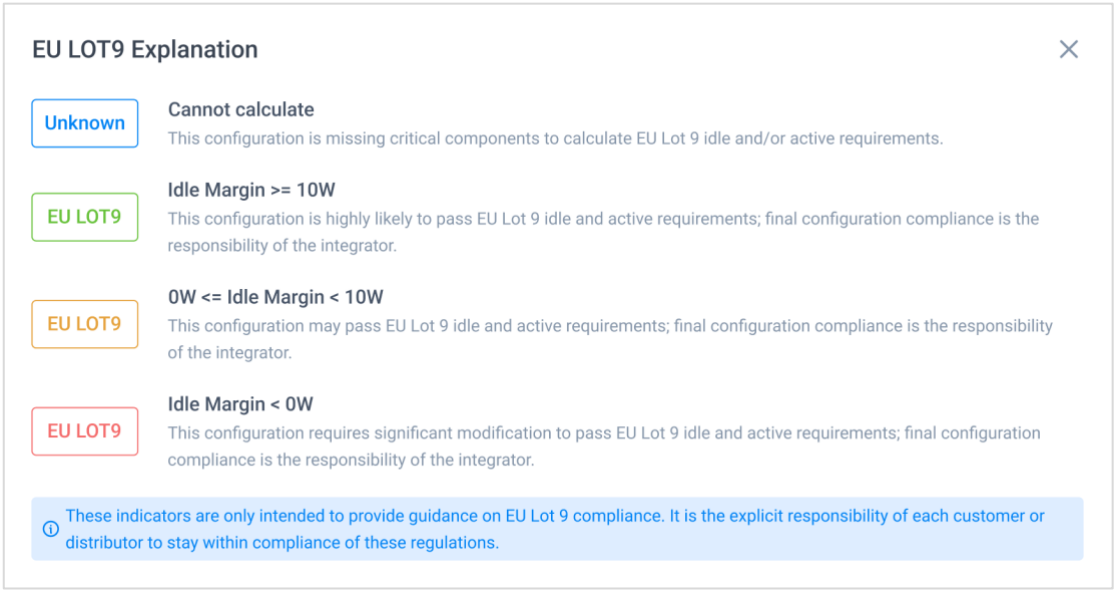


- Note: Power Calculator is Unavailable now, please go to Servertools to make sure PSU option selected can meet total system power requirement prior to submitting CTO orders.



6. When all the configuration checks are completed, user can click on the [Save] (5) which will save the configuration.





- Note: EU LOT9 Explanation
